5) Next Week's Work Plan

- 1. develop the model in order to change the values softly not to rise and fall sharply (I think 'the class of tech neck posture' and 'the class of correct posture' are still ambiguous.)
- 2. log in system shortly (ID, PW, Duplicate ID check)
- 3. CSS web design to show the value of count (how many times the user have tech neck)

6) submitted date: 09 / 30 / 2021 (e.g. 3/30/2021)
